## Section B – Fill in the Blank (1 mark each, 14 total)

In CSS, colors are represented by three primary colors: \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_. The element used to separate sections of HTML is a \_\_\_\_\_.

Elements are centered by setting the left/right \_\_\_\_\_ to \_\_\_\_\_. An example of an absolute unit is \_\_\_\_\_. An example of a relative unit is \_\_\_\_\_.

The \_\_\_\_\_ selector selects all elements. A common website font is \_\_\_\_\_. A possible font-style is \_\_\_\_\_. A possible font-variant is \_\_\_\_\_. To use a rounded border, set the \_\_\_\_\_ property. To style one specific element, an \_\_\_\_\_ can be used as a selector.
