

# WordPress

---

DAVID LU

# Customization

---

WordPress themes are often highly customizable

Customizations include

- Logo
- Color palette
- Fonts
- Header images
- Menus
- Widgets
- Featured content
- Theme-Specific options

Play around with it!

# Widgets

---

WordPress widgets are self-contained content boxes

Widgets can be placed in many different places (sidebar, footer, etc.)

In self-hosted versions of WordPress, widgets can be very powerful

- We can only use text widgets

To add a text widget:

- Customize > Widgets > Footer 1 > Edit Widget

Change up your text widgets!

# Project

---

Your projects are due by the end of this class

Any questions?
